Docket No.: 13365-US-PA

**AMENDMENT**

**To the Claims:**

**Claim 1-24 (cancelled).**

Claim 25. (currently amended) A chip with polymer thereon, comprising at least:  
a chip having an active surface;  
a polymer, disposed at periphery of the active surface of the chip extending to  
sidewalls of the chip; and

a plurality of wires electrically connecting the chip and a carrier for carrying the  
chip, wherein an end of each of the wires connected with the active surface of the chip is  
covered by the polymer and the other end of each of the wires connected with the carrier is  
exposed outside of the polymer.

**Claim 26-27. (cancelled)**

Claim 28. (currently amended) The chip with polymer thereon of claim 25,  
wherein the polymer further covers a portion of the carrier.

Claim 29. (currently amended) The chip with polymer thereon of claim 25,  
wherein the carrier comprises a leadframe or a circuit substrate.

Claim 30. (original) The electrical package structure of claim 25, wherein the

polymer is shaped as a ring covering whole periphery of the active surface of the chip.

Claim 31. (original) The electrical package structure of claim 25, wherein the polymer is shaped as strips covering two opposite edges of the active surface of the chip.

Claim 32. (original) The electrical package structure of claim 25, wherein the polymer is shaped as a plurality of pieces covering four corners of the active surface of the chip.

Claim 33. (original) The electrical package structure of claim 25, wherein the polymer comprises a stress buffer polymer.

Claim 34. (original) The electrical package structure of claim 33, wherein the stress buffer polymer comprises epoxy resin or polyimide.
